Welcome

YBM introduction and consent

1 **MyPhone/MyBrain Intervention Study**

Information · `study_intro` · `ybm_intro_consent.intro`

You are invited to take part in a research study conducted by the University of Leeds. Before deciding whether to participate, please read the information below carefully. If anything is unclear, please ask a member of the research team. Taking part is voluntary, and you may withdraw from the study at any time without giving a reason.

As part of this study, we will ask you to complete questionnaires about your wellbeing and digital behaviour, alongside laboratory measures including EEG, ECG, and eye tracking. Your information will be handled confidentially and stored securely in accordance with University of Leeds data-protection procedures.

This questionnaire should take approximately 10 minutes to complete. Please answer the questions carefully and as accurately as you can.

This study has received ethical approval from the University of Leeds School of Psychology Research Ethics Committee (Ethics Reference: SoPrec 4202; approved 11 June 2026).

2 **Please tap each statement to show you understand and agree to it, and that you consent to take part. We'll move on once they're all ticked.**

Statements to tick · Required · `consent` · `ybm_intro_consent.consent`

Connected Yorkshire is a secure research service that brings together information from the NHS, schools and councils in Yorkshire, so researchers can study what helps young people's health and learning.

Taking part in this study includes this: we will send your name, date of birth and address to Connected Yorkshire. They use them only to find your health records (like GP and hospital visits) and education records (like attendance and exam results) and join them to your answers.

Before any researcher sees the joined-up information, your name, date of birth and address are taken off and replaced with a code. Researchers only ever see the code, so they cannot tell who you are.

The link continues for as long as the research goes on, unless you ask us to stop. You can stop it at any time by emailing brainpop@leeds.ac.uk — you don't have to give a reason.

1. I confirm that I am aged 18 or over.
2. I understand that anonymized results from this study may be disseminated through conference presentations, publication in peer reviewed journals, compiled as part of a report, used in future projects, included on institutional websites, presented in electronic theses and may be made available on online data repositories.
3. I understand that my name, date of birth and address will be kept separately from my research data and used only to link my information to my participant ID, including to help retrieve my participant ID if I forget it when signing in to the MyPhoneMyBrain/Break website. I understand that I will not be identified or identifiable in any reports resulting from the research.
4. I understand that if I choose to withdraw my data by contacting the primary researcher within 24 hours of submission (up until {withdrawal_date}) that my responses will be removed from the dataset and not used for analysis
5. I understand that I am free to withdraw at any time without giving any reason and without there being any negative consequences
6. I understand that Brick will be used to restrict access to agreed social media applications on my smartphone.
7. I understand that donating the requested summary smartphone usage information is a required part of the study.
8. I understand how my research data will be stored, used, and protected.
9. I have read and understood the information on the study presented above and have been offered the opportunity to ask the research team questions via email (m.faizah@leeds.ac.uk)
10. I agree to take part in this study

Moves on by itself once every statement is ticked.

3 **Why your answers matter**

Information · `why_accurate` · `ybm_intro_consent.why_it_matters`

There are no right or wrong answers here

What you tell us goes into research on how sleep, screens and feelings fit together for people your age, and on what actually helps. That only works if the answers are really yours, including the ones that aren't flattering.

A rushed or made-up answer doesn't just lose one number. It makes the whole picture slightly less true — for everyone the research is meant to help.

So take your time. And if you'd rather not answer something, leave it blank — that's always allowed.

Study questions

4 **Participant ID**

Short text · Required · `new_question_3` · `social_media_break_lab_studio.new_question`

Your Participant ID starts with MP followed by 12 letters/numbers (e.g., MPC73AF6350736). It was automatically created when you completed the informed consent form on the MyPhoneMyBrain website. You can find it in your confirmation email.

About you

YBM participant identifiers

MacArthur Scale of Subjective Social Status – Adult Version

54 **Where would you be on this ladder?**

Ladder · Asked (can be skipped) · `sss_society` · `macarthur_sss_adult.society`

Think of this ladder as representing where people stand in society in the UK.

At the top are the people who are best off — those who have the most money, the most education, and the most respected jobs.

At the bottom are the people who are worst off — those who have the least money, the least education, and the least respected jobs, or no job.

Where would you place yourself on this ladder at this time in your life?

10 rungs

---

55 **Where would you be on this ladder?**

Ladder · Asked (can be skipped) · `sss_community` · `macarthur_sss_adult.community`

Think of this ladder as representing where people stand in their communities.

People define community in different ways. Please think about the community that is most meaningful to you.

At the top of the ladder are the people who have the highest standing in their community. At the bottom are the people who have the lowest standing.

Where would you place yourself on this ladder at this time in your life?
